Technical Support

Simultaneous Translation —

Full digital translation systems transmitting excellent voice quality and our custom made oak interpretation booths contribute to the success of international meetings.

Sound Systems — High quality equipment coupled with the expertise of its technicians enables CP Centro Pilota to fulfill the most diverse needs of almost any event or conference.

Audio Taping — Analogue or digital recording on cassettes, CDs or in MP3 format: files can also be sent via the Internet for immediate download, transcription or translation.

Video projection — Aware that audiovisual technology is a fundamental element for any conference or meeting, CP Centro Pilota offers projectors that are suitable for the meeting size.

Video conference — The ideal way to have people from remote locations participate in a meeting without the need of travelling.

Audio conference — A professional audio connection that allows three or more people to communicate using any wired or mobile telephone.

Filming & CCTV Services:

- I-Mag (Image Magnification) shows the speaker on large projection screens or plasma monitors
- Filming medical surgeries for live viewing from the conference hall, via video conference or CCTV
- Video streaming with PowerPoint integration for live or on demand viewing
- Recording in digital Beta, DVcam or DVD (NTSC or PAL) and post production

Lighting — Have company logos projected using intelligent lighting or follow spots for award ceremonies. Lighting shows are tailored for each event's needs.

Staging — Stage, backdrop, lecterns with branding are custom built per design to "set the stage" for your event.

Technical Support — With nine permanent staff members, our company assures highly qualified technicians that have many years of experience and that also pay attention to their demeanour and attire.

Interpreters — Playing an essential role in guaranteeing the success of an international event, CP Centro Pilota only engages interpreters that are members of professional associations.

Audience Response Systems — Used to create interactivity create interactivity between a presenter and his or her audience in any meeting or conference.

Video Conference Room —

The video conferencing facility permanently installed at our offices is ideal for individuals and small groups who need to communicate in a clean, efficient and air-conditioned environment.

Hostesses & Stewards —

Rigorous selections are made to offer multilingual professional personnel at conferences and events. They can be easily recognized by our standard blue attire that can be customized with foulards, ties or other accessories that reflect the clients colouring code.

Translations — Scrupulous attention is given to selecting the appropriate team of mother tongue freelance translators to ensure faithful translations.

Transcriptions — Whether during a meeting or once the event is over, transcriptions can be performed in Italian, English, French, Spanish and German from a variety of media (cassettes, CDs, DVDs, MP3, streaming audio, etc) .
